M. HELENA McMILLAN, Principal, 277 Ashland Blvd.

Representing the Alumnae Association

RACHEL G. BLANCHARD.

PHYSICIANS TO THE SCHOOL

JAMES B. HERRICK, A. B., M. D.

E. E. IRONS, S. B., M. D.

FACULTY

M. HELENA McMILLAN, B. A., Superintendent of Nurses, Illinois Training School.

MAY RUSSELL, In charge of the Preliminary Department, Waltham, Mass.

MINERVA WILSON, Instructor and Supervisor of Nursing, Presbyterian Hospital, Chicago.

LOUISE C. MORRISON, Instructor and Supervisor of Nursing, Presbyterian Hospital, Chicago.

WALTER STANLEY HAINES, A. M., M. D., Professor and Head of the Department of Chemistry, Materia Medica, and Toxicology, Rush Medical College.

J. CLARENCE WEBSTER, M. D., F. R. C. P. (Edin), Professor and Head of the Department of Obstetrics and Gynecology, Rush Medical College.

EDWIN RAYMOND LECOUNT, M. D., Associate Professor of Pathology, Rush Medical College.

BIRD MCPHERSON LINNELL, A. B., M. D., Assistant Professor of Physiology and of Medicine, Rush Medical College.

CHARLES AUBREY PARKER, M. D., Assistant Professor of Anatomy and of Surgery, Rush Medical College.

SUPERVISORS AND INSTRUCTORS

RACHEL G. BLANCHARD, Night Supervisor, Presbyterian Hospital, Chicago, 1906.

EMMA B. AYLWARD, In charge of the Home, Lewis Institute, Chicago.

MARGARET E. TILL	<div style="display: inline-block; vertical-align: middle; font-size: 3em; line-height: 1;"> { } </div>	Supervisors	Royal Victoria Hospital, Montreal.
EDITH A. MOFFATT		of	Royal Victoria Hospital, Montreal.
ELIZ. M. M. WRIGHT		Operating Rooms	Royal Victoria Hospital, Montreal.
EDA M. OFFERMAN			Columbus, Ohio.

SARAH BENEDICT, Instructor of Dietetics, Pratt Institute, Brooklyn, N. Y.

MAE BURTCH, Supervisor of Gynecological Department, Presbyterian Hospital, Chicago, 1906.

FAYE L. JACKSON	<div style="display: inline-block; vertical-align: middle; font-size: 3em; line-height: 1;"> { } </div>	Supervisors	Presbyterian Hospital, Chicago, 1907
GERTRUDE MCKEE		of Surgical	Akron City Hospital, Akron.
CANDICE MONTFORT		Departments	Presbyterian Hospital, Chicago, 1907.
HELEN WAPSHOTT, Supervisor Children's Department.			

Children's Hospital, Toronto.

Manhattan Hospital, New York.

SADIE S. NELSON, Supervisor Medical Department, Presbyterian Hospital, Chicago, 1907.

EURETTA P. KINGSBURY, Supervisor Obstetrical Department. Cleveland.
Lakeside Hospital,
Lying-In Hospital, New York.

The Lecture Courses are in Charge of the Following:

DEPARTMENT OF MEDICINE—

FRANK BILLINGS, M. S., M. D., Dean of the Faculty, Professor and Head of the Department of Medicine, Rush Medical College, and Professor of Medicine in the University of Chicago.

JAMES BRYAN HERRICK, A. B., M. D., Professor of Medicine, Rush Medical College.

DEPARTMENT OF SURGERY—

ARTHUR DEAN BEVAN, M. D., Professor and Head of the Department of Surgery, Rush Medical College.

DAVID W. GRAHAM, A. M., M. D., Clinical Professor of Surgery, Rush Medical College.

DEPARTMENT OF CHEMISTRY, MATERIA MEDICA AND TOXICOLOGY—

WALTER STANLEY HAINES, A. M., M. D., Professor and Head of the Department of Chemistry, Materia Medica and Toxicology, Rush Medical College.

DEPARTMENT OF BACTERIOLOGY—

EDWIN R. LECOUNT, M. D., Associate Professor of Pathology, Rush Medical College.

DEPARTMENT OF DISEASES OF CHILDREN—

JOHN M. DODSON, A. M., M. D., Professor of the Diseases of Children, Rush Medical College.

ALFRED C. COTTON, A. M., M. D., Professor of the Diseases of Children, Rush Medical College.

DEPARTMENT OF OBSTETRICS AND GYNECOLOGY—

J. CLARENCE WEBSTER, M. D., F. R. C. P. (Edin), Professor and Head of the Department of Obstetrics and Gynecology, Rush Medical College.

ALBERT BELCHAM KEYES, M. D., Assistant Professor of Obstetrics and Gynecology, Rush Medical College.

FRANK W. LYNCH, M. D., Assistant Professor of Obstetrics, Rush Medical College.

DEPARTMENT OF ANATOMY—

CHARLES AUBREY PARKER, M. D., Assistant Professor of Anatomy and of Surgery, Rush Medical College.

DEPARTMENT OF PHYSIOLOGY—

BIRD MCP. LINNELL, A. B., M. D., Assistant Professor of Physiology and Medicine, Rush Medical College.

DEPARTMENT OF DISEASES OF THE CHEST, NOSE AND THROAT—

EPHRAIM F. INGALS, A. M., M. D., Professor and Head of the Department of Diseases of the Chest, Throat and Nose, Rush Medical College.

DEPARTMENT OF NERVOUS AND MENTAL DISEASES—

DANIEL ROBERT BROWER, A. M., M. D., Professor of Nervous and Mental Disease, Rush Medical College.

DEPARTMENT OF SKIN—

JAMES NEVINS HYDE, A. M., M. D., Professor and Head of the Department of Skin, Genito-Urinary and Venereal Diseases, Rush Medical College.

INSTRUCTOR IN BANDAGING—

JOSEPH F. SMITH, M. D., Associate in Surgery, Rush Medical College.

INSTRUCTOR IN MASSAGE—

HUGO AD OLDENBORG, G. D., Associate in Therapeutics, Rush Medical College.

ANNOUNCEMENT

THE School for Nurses of the Presbyterian Hospital has the advantage of being a new, modernly organized school, connected with a general hospital well known and highly respected throughout the country, and affiliated with the Rush Medical College, one of the oldest institutions of learning in the Northwest. These three facts assure to the students of the school a course of instruction which will be of the highest order; which will meet the desires of those aiming for high professional training and will educate women to be thoroughly competent in the practice and theory of nursing in all its branches. The schedule covers three and a half years' training, of which the first six months is a preparatory period. During this preliminary time the pupil resides in the Nurses' Home and receives both practical and theoretical instruction in many points which it is necessary for her to know before undertaking actual nursing in the wards of the hospital. The object of this preliminary training is to prepare the student to enter upon the heavy duties of the nurse, properly equipped physically and technically.

During the junior and senior years pupils receive instruction in special nursing by being assigned to care for private patients in the Presbyterian Hospital. Arrangements have been made by which optional courses in contagious and in insane nursing may be taken by nurses desiring such training in the contagious wards of the Cook County Hospital and in the Infirmary of the Elgin Insane Asylum.

LOCATION

THE staff and students of the School reside in the Home, 277 Ashland boulevard, corner of Congress street. It may be reached by any of the trains of the Metropolitan Elevated Railway, being one block southeast of the Marshfield station; by the Van Buren or Harrison streets electric lines, both of which cross Ashland boulevard.

The Home consists of four residences, remodeled and equipped to suit the needs of the School, and a large dormitory building facing Congress street. It is cheerful and homelike with comfortable sitting rooms and dining rooms provided.

The house being several blocks from the hospital and college, a walk in the fresh air is necessary to reach either class room or ward duty. This, and the fact that the pupil, in her home life, is entirely removed from the atmosphere of sickness, are of vital importance to the nurse, and help to secure her good health.

The Presbyterian Hospital, where the pupil receives her training in hospital nursing and executive work, is an institution of over two hundred beds, with both private and free ward patients. Built over twenty years ago by some of Chicago's leading men, it has continued to hold a prominent place among the city hospitals. The governing board is identical with the board of management of the School for Nurses. The members of the medical board in large part are also members of the faculty of the Rush Medical College.

Lectures being held in the Rush Medical College, the class rooms of the college are used by the School. The college also grants to the pupils of the School the privilege of using the well-equipped medical library, containing about 10,000 volumes.

The Central Free Dispensary, which the pupils attend for minor surgical and medical work, is held in the Senn Hall of the Rush Medical College, a modern fireproof building opened in 1902.

REQUIREMENTS FOR ADMISSION

CANDIDATES for entrance must have a high school education or its equivalent, preference being given to women who have had one or more years of college work; they must be in good health and between twenty and thirty years of age. The candidate is required to make a formal application by filling out the answers to the list of questions, which must be sent to the principal of the school, with a letter from a physician as to physical fitness and letters from responsible persons as to good character and personal and educational qualifications. When possible application should be made in person.

Two classes are formed yearly, students entering in the spring and in the fall, and at no other time. The object in receiving pupils at two stated periods is to secure a systematic training for each, in the schedule course of theoretical and practical instruction. As it is most helpful in her theoretical work for the student to have some knowledge of Elementary Chemistry, Physiology, Physics and Zoölogy, if the applicant is unfamiliar with any one of these subjects it would be advisable for her to devote what time she may have at liberty between her acceptance into the School and her entrance in the study and reading of the subject.

The first six months, besides being a period of preparation under constant instruction, is also one of probation. The pupil must consider herself on trial during the entire period. Unless she shows a general fitness for nursing, good health and an ability to keep up with the class instruction, she will not be allowed to matriculate. Should the pupil successfully pass all examinations at the end of the first half year and give satisfactory proof of good practical work with general fitness, she is received into the School and her training in the hospital begins.

Each year examinations are held upon the work taken up during the term. The standing of the pupil is based upon the general character of work and behavior throughout the year and the results of the examinations.

The School reserves the privilege of dropping a pupil at any period of her training for misconduct, inefficiency or neglect of duty.

The School is supported by the Presbyterian people and churches of Chicago, but admits women of all creeds. Each pupil is expected to attend her own church regularly.

GENERAL INFORMATION

REFERENCE books and some copies of the selected text-books are placed in the school study for the use of the pupils. Should students wish to purchase their own they may do so at a total cost of about twelve dollars. The following are the text-books:

- Practical Nursing. Maxwell, Pope.
- Ethics of Nursing. Hampton-Robb.
- Physiology. Martin's Human Body.
- Anatomy and Physiology. Kimber.
- Materia Medica for Nurses. Lavinia Dock.
- Hygiene for Students. Willoughby.
- Dietetics for Nurses. Friedenwald & Ruhrah.
- Elementary Chemistry. Remsen.

Uniform Outfit—The uniform outfit required after the probationary term is furnished to the pupil at cost price. It consists of a plain blue gingham dress, white apron, collar, cuffs and cap. The cost of this is estimated to be not more than fifteen dollars yearly.

Tuition—An entrance fee of twenty-five dollars is charged for the first six months to cover, in part, the expense of the instruction given. Pupils receive board, lodging and a reasonable amount of laundry from the date of entrance.

Ten dollars is deposited upon entrance to provide for such breakage or loss as may occur throughout the course. Any balance remaining will be returned to the nurse at the time of graduation.

Loan Fund—A fund has been established to assist students who require financial aid. After residence in the school of one and a half years, application may be made for a moderate loan, this to be returned to the school within a year after graduation, or, should the student fail to graduate, as soon as possible after she leaves the school.

The Albert M. Day Prizes—Also for the purpose of assisting students, six prizes of twenty-five dollars each are given yearly by Mr. Albert M. Day, the President of the Institution. Students wishing to aid themselves financially by competing for these prizes should, upon entrance, present their names to the Principal of the School.

General Expenses—It has been proved that (after the original outfit), with strict economy, a student may carry herself through the course on an income of ten dollars a month, but it would hardly be possible to do so on a smaller amount.

Hours on Duty—During the preliminary term the pupil has daily an average of six hours' practical work, under supervision, and two hours of class instruction. The rest of the time is expected to be used for study, with the necessary amount given to rest and recreation.

After her entrance into the hospital she has, ordinarily, eight hours of practical nursing out of the twenty-four. In the operating room, the maternity, on special duty, or in case of need or emergency, the pupil will be on duty longer, and must be prepared to serve longer hours.

Vacation—Twelve weeks' vacation is allowed during the entire course, given when the conditions of the institution will permit.

Sickness—In sickness the pupil will be cared for at the expense of the school. Time lost through illness or for any other cause must be made up by prolonging the course.

If students are called away for any reason or compelled to give up their work on account of illness, the vacancies thus made cannot be held for them.

A candidate accepted for the probationary term should bring with her: Four entire dresses, plainly made, of material similar to sample provided and made as instructed; seven large white aprons; two bags for soiled clothes; underclothing made plainly, without ruffles or trimming. Each article must be distinctly marked with indelible ink and not with a stencil, with the full name of the owner. Waists and articles with neck bands must be marked upon the inside of the back of the neck band; all skirts or garments with skirt bands must be marked upon the band.

As rubber heels must be worn on duty, each pupil should bring a pair of comfortably fitting shoes with rubber heels. A watch with a second hand is also needed.

Pupils being out in all kinds of weather, it is necessary for them to come provided with warm underwear, a long coat, rubbers and umbrella. Each nurse, in addition, must bring a plainly trimmed hat, which, with a quiet appearing coat, must be worn going to and from duty. As the uniform is worn on the street only when necessary and not when the nurse is on personal business or on pleasure, a simple street dress is required. Linen collars may be purchased at the school after arrival; the white sleeves and cap worn during the probationary period are provided by the school.

Accepted candidates whose teeth are out of order should have them

attended to before coming for the probationary period; it is absolutely essential that each should have a successful vaccination before entering. The latter matter should be attended to as soon as the applicant receives notification of her acceptance. Upon arrival in the city, if desired, trunk checks may be brought to the Home, where their delivery will be attended to.

Address correspondence to M. Helena McMillan, Principal, 277 Ashland Boulevard, or Presbyterian Hospital, Chicago. Telephone West 1831.

RULES FOR THE HOME

THE rising bell is rung at 5:30.

First breakfast is served at 6:15.

Nurses report for duty at 7 a. m. Before leaving the Home for the Hospital or other duty each nurse must make her bed, dust and leave her room in good order.

The hour for closing the Home is 10 p. m. All pupils are expected to be within doors at that hour unless they have special permission to be absent, and must not stay away from the Home over night without permission. Lights are turned out in the parlors and halls at 10 p. m., and nurses must retire to their own rooms. Lights in bed rooms must be turned out at 10:30 p. m., and during the evening turned out in these rooms whenever left vacant, the utmost economy of gas being necessary.

Nurses are expected to preserve at all times a quiet demeanor in halls, stairways and dining rooms; loud talking or laughing will not be permitted. Care must be observed by each resident to protect the furniture and other property of the School; matches must not be struck on the walls; the pipes in the bath rooms and other plumbing must not be plugged by careless use; sheets, towels and other household linen must be preserved for their legitimate purposes.

Hours for Meals—First breakfast, 6:15 a. m.; second breakfast, 7:15 a. m.; first dinner, 12 m.; second dinner, 1:15 p. m.; first supper, 6 p. m.; second supper, 7:15 p. m.

Nurses must be prompt in coming to their meals and must not linger in the dining room after meals. No food is provided out of the appointed time, except with permission.

Dishes, silver or food must not be carried from the dining room to the bed rooms. Nurses are not to go into the kitchen or to give orders to any of the servants. No visitors may be invited to meals or to spend the night in the Home.

Laundry Regulations—Clothes must be listed and ready for the laundry each Monday at 7 a. m. The following articles are allowed each nurse per week: Seven pairs cuffs, seven collars, one cap, seven handkerchiefs, two colored skirts, seven aprons, two belts, two dresses, one plain shirt waist, and twelve articles of underwear. One white skirt is allowed every two weeks, and a wrapper once a month.

Any clothing in excess of the specified number of each article, and all elaborately trimmed garments will be returned unwashed, as also those found with pins, torn or otherwise uncared for. All clothes must be distinctly marked in places where the name will be easily seen by the laundress. Washing must not be done in the bed rooms or bath rooms.

When a nurse is sick she should report at once to the Principal, or an assistant, who will see that she is prescribed for, if necessary, by a physician. Nurses must not obtain medicine for their own use from the wards or drug store of the hospital. Nurses must not return to the hospital

when off duty without permission. They are not permitted to receive calls or telephone messages in the hospital from their friends, and should request their friends to observe this rule by calling upon them at the Home and also sending mail to that address. Food, linen, silver or any property of the Hospital must not be carried to the Home.

Pupils will be excused from classes and lectures only on account of illness.

OUTLINE OF COURSES

THE Preparatory Course—Beginning Spring and Fall.—The morning hours are devoted to practical work under supervision, comprising instruction and practice in: Invalid cookery, setting and serving of trays, making surgical supplies, care of linen, making beds, giving baths, etc. In the Pharmacy of the Presbyterian Hospital the pupil is taught to make solutions and becomes somewhat familiar with the appearance of drugs; in the Central Free Dispensary she comes in contact with the patient and assists at the clinics in minor ways.

The afternoon hours are devoted to theoretical instruction, including classes in dietetics, ethics of nursing, and practical demonstrations in elementary nursing.

Anatomy, Chemistry, Physiology, Materia Medica, Bacteriology, and Hygiene are taught in laboratory or class recitation by instructors provided by the staff of the Rush Medical College.

Examinations are held in the above subjects at the end of each course.

FIRST YEAR.

Medical Lectures—Twice a week for two months; October and November.

Chemistry—Three times a week; December and January.

Surgical Lectures—Twice a week; February.

Bandaging—Twelve classes; March.

Gynecology—Twice a week; April, May.

Classes in nursing.

Examinations on each of the above subjects at end of the course.

SECOND OR JUNIOR YEAR.

Nursing of Children—Two lectures weekly; October, November and December.

Toxicology—Two lectures weekly; January.

Urinalysis—Two exercises weekly; February, March.

Nervous Diseases—Two lectures weekly; April.

Contagious Diseases—Two lectures weekly; May.

Class work in nursing and allied subjects.

Examinations in each subject at the close of the course.

THIRD OR SENIOR YEAR.

Medical Lectures—Two lectures weekly; October.

Massage—Four classes weekly; November, December.

Surgical Lectures—Two weekly; December.

Obstetrics—Two classes weekly; January, February.

Care of the Eye, Ear, Nose, Throat—Two lectures weekly; March, April.

The Skin—Two lectures weekly; May.

Talks and lectures on special subjects.

Examinations are held in each of the above subjects at the close of the course.

COURSES OF INSTRUCTION

PRACTICAL NURSING.—MAE RUSSELL, MINERVA WILSON, LOUISE C. MORRISON, *Instructors*.

THIS instruction is given in weekly classes held from October to June, taking up in recitation and by practical demonstration such points as may be included in the principles and practice of nursing. The following are some of the subjects emphasized: Care of the ward and hospital supplies; making of all kinds of beds; giving baths; external applications; giving enemata and douches; catheterizing; method of charting and recording symptoms, etc.

This instruction is supplemented by teaching received from graduate nurses in the Presbyterian Hospital, the Central Free Dispensary and, in the obstetrical department in the homes of the poor, during the delivery and in subsequent daily calls.

Arrangements have also been made by which pupils of the School wishing training in contagious or insane nursing may obtain the former in the contagious department of the Cook County Hospital and the latter in the infirmaries of the Elgin Insane Asylum. Pupils desiring to take training in either or both subjects should give their names to the Principal of the School as early as possible after their entrance, in order that the rest of their training may be regulated with that in view.

ETHICS OF NURSING.—M. HELENA McMILLAN, *Instructor*.

This consists of short courses of class instruction given in the preliminary term, and in the senior year. The object is to give the pupil an idea of what position the nurse holds in the working world; her attitude towards patients, the public, physicians; the qualifications of the good nurse, and other points which must be observed by the nurse to assure success in her profession.

COOKERY.—SARAH BENEDICT, *Instructor*.

A study is made of the different classes of foods and the part they play in nutrition.

An effort is made to take pupils to visit markets, bakeries and different food manufactories.

In class instruction the choice of foods is considered; modification of milk is demonstrated; and the principles involved in feeding the sick are studied. In the Diet Kitchen in the Hospital the pupils receive practical instruction in Invalid Cookery in preparing food for the patients.

The object of the course is to give the essentials of dietetics, and enable the nurse to carry out intelligently the orders of the physician.

Time, six to eight weeks.

Text-Book of Dietetics for Nurses, by Friedenwald & Ruhrah.

ANATOMY

CHARLES AUBREY PARKER, M. D.

The work in anatomy comprises twenty-four exercises held in the laboratory of Rush Medical College.

The teaching in this branch is a combination of didactic and recita-

tion methods with the aim of furnishing the student a thorough, practical acquaintance with the superficial regional and general anatomy of the human body.

To this end free use is constantly made of material judiciously selected from the laboratory of the college for demonstration, with special reference to the needs of the students.

Three hours weekly for two months.

PHYSIOLOGY

BIRD MCPHERSON LINNELL, A. B., M. D.

The required work includes lectures, recitations and laboratory work.

The teaching is designed to familiarize the students with such facts and experiments in physiology that they may follow intelligently the various changes bearing on nursing.

Three hours weekly for two months.

MATERIA MEDICA

WALTER S. HAINES, A. M., M. D.

The course consists of sixteen lectures, conferences, and laboratory exercises given during the preliminary six months of training. The subjects taken up are weights and measures, forms of drugs and their mode of administration, classification of drugs, and a brief account of the more important drugs used in the practice of medicine.

Text-Book: Lavinia Dock's *Materia Medica for Nurses*.

COURSE IN BACTERIOLOGY

EDWIN R. LECOUNT, M. D.

Making of the ordinary media upon which bacteria are usually grown will precede study of a few forms illustrating morphologic types and species. Each student will make personal observations of methods of growth, form, staining properties, and other characteristics. During the work, the technic employed in the study of bacteria will be acquired, together with a knowledge of the plate method, the various culture media, the use of fermentation tubes, and other methods of isolating and identifying bacteria.

Practical application of this technical skill will then be made studying the thermal death points of bacteria, the methods of sterilizing the hands and suture material, the occurrence of bacteria in dust, the air, water, utensils of operating rooms, surgical dressings, etc. There will be no systematic lectures, but instead brief talks, demonstrations of the use of apparatus or discussions.

References will be given frequently to text-book or other accounts in literature relating to the work.

Ten hours a week for eight weeks.

CHEMISTRY

WALTER S. HAINES, A. M., M. D.

Instruction in this subject is given during the first year in sixteen exercises, consisting partly of lectures and conferences and partly of work in the laboratory. The course covers the more important general principles of chemistry and certain of the chief elements and their compounds.

Text-Book: Remsen's Elementary Chemistry.

URINALYSIS

WALTER S. HAINES, A. M., M. D.

The course consists of eight exercises, given in the second year, largely in the laboratory, on normal and pathological urine. Instruction is given in the collecting of proper specimens for analysis, in determining the reaction, the specific gravity, and the amount of urea, and in testing for sugar, albumen, biliary matter, and other important abnormal elements. The recognition by the microscope of the chief urinary sediments is also included.

Text-Books: Legge on the Urine, and Haines' Practical Directions for Clinical Urinalysis.

TOXICOLOGY

WALTER S. HAINES, A. M., M. D.

The instruction consists of eight lectures and conferences given during the second year on the subject of the most important poisons, their properties, effects and treatment.

Text-Book: Tanner's Memoranda of Poisons.

REQUIREMENTS FOR GRADUATION

PUPILS presenting for graduation must have spent three years and six months in the School, must have accomplished the required practical and theoretical work laid down, and have passed all examinations.

Should pupils be admitted for advanced standing from other approved schools for nurses, they must show work accomplished covering three and a half years, of which at least two years and six months are spent in this school, must pass all examinations, and must have a record of good, practical work and conduct.

Positions open to the graduates of the School will occur on the teaching staff of the School, as Supervising Nurses in the Presbyterian Hospital, in the clinics of the Rush Medical College and of the Central Free Dispensary.

GRADUATES

1906

Barron, Julia P.....Now Mrs. Harvey H. Lord
Blanchard, Rachel G.....Night Superintendent, Presbyterian Hospital

Bostater, Elizabeth	Private duty nurse, Chicago
Burtch, Mae.....	Supervising Nurse, Presbyterian Hospital
Fish, Leah M.....	Private duty nurse, Chicago
Fraser, May	Private duty nurse, Chicago
Gerrish, Alice	Private duty nurse, Chicago
Giddings, Mabel	Private duty nurse, Chicago
Martin, Caroline L.....	Superintendent Knowlton Hospital, Milwaukee
